### Sewing Project Is Discarded For Job At Making Cartons

Perry Women Find Gainful Employment With Their Hammers

Perry, Fla., Aug. 14.—The women's sewing project of the Taylor County commissioners has been discarded for job at making cartons in a bad way.

And all on account of the Fair Labor Standards Act, too.

The women are all leaving the project and have joined the local industry that is salvaging both waste lumber and human beings that have fallen on bad times. Don't you wish the little gypsies in their hammers had six bottles of a soft drink from the corner grocery. Up to lately they've been made of paper. Now they're made of Florida cypress that heretofore has gone into the burner as useless.

The four patrolmen were riding in one car—making the rounds for their "detained territory"—awaiting the arrival of three more cars from state headquarters.

I have my figures right there. The four members of the patrol to date in the recent session of the legislature received \$500 to \$1,000 and that will give the organization some cash to work with.

Every time we see one of those uniformed state patrolmen we feel just a bit proud of my efforts in the 1937 legislature to establish such an organization. Although we tried everything possible to get it through the group in the '37 session, but after the '39 session the patrol came along. I've watched it closely since its organization and the group is doing a splendid work.

With a state patrolman located in Pahokee and another in Belle Glade I'm predicting that some of these one-eyed cars will carry a couple of lights at the front and a few driving in these darkened streets—for, after all, one is a part of the patrolman's job—and a big part too.

And speaking of law enforcement officers, the state patrol in Pahokee made a change in city patrolmen last Friday night. Ford Cochran and Buck Humphries were replaced by Albert Gant and E.O. Murray. Since the recent election there hasn't been police appointments made—Buck and Fred were merely working at the pleasure of the council. The regular patrols are still on duty day and night. The new patrolmen were instructed to curb speeding in the city limits and perform other duties as best they can—or turn in to the judges—not wait for the council to call for them.

The shake-up in the police department was the result of a police strike in Pahokee last Friday night. Fred Cochran and Buck Humphries were replaced by Albert Gant and E.O. Murray. Since the recent election there hasn't been police appointments made—Buck and Fred were merely working at the pleasure of the council. The regular patrols are still on duty day and night. The new patrolmen were instructed to curb speeding in the city limits and perform other duties as best they can—or turn in to the judges—not wait for the council to call for them.

The shake-up in the police department was the result of a police strike in Pahokee last Friday night. Fred Cochran and Buck Humphries were replaced by Albert Gant and E.O. Murray. Since the recent election there hasn't been police appointments made—Buck and Fred were merely working at the pleasure of the council. The regular patrols are still on duty day and night. The new patrolmen were instructed to curb speeding in the city limits and perform other duties as best they can—or turn in to the judges—not wait for the council to call for them.

Belle Glade is soon to have an election for the present mayor—Apolio L. Klimm. From all accounts it seems that the folks of Belle Glade are pretty well satisfied with the present mayor's accomplishments, so he is a sure bet that he will be elected without opposition. He is an ardent civic worker—a faithful executive—and has made an outstanding city official in the capacity of mayor.

Car Who Was Home

In a car accident on Canal Point Road last May, was dismissed from Everglades Memorial Hospital last week and has returned to his home in Brooklyn, N.Y.

He was accompanied by his sister, Miss Josephine Hishock, who has lost her life, beside the accident.

They were taken by car as far as Wilmington, Del., by Mrs. Evelyn Strett Mook, hospital supervisor, who spent a three weeks' vacation with relatives in Delaware and Maryland.

### Laundry Has New Pick Up Man

R. Cowart, proprietor of the No. 1 Laundry and Dry Cleaning plant in Pahokee, has announced that beginning this week Peewee T. Peewee will be associated with him in the pick up and delivery department. Peewee is well known in Pahokee and has a number of friends here. It is known that he is again able to go back to work after suffering a back injury in the explosion of a drill charge some months ago. Following the accident he was laid up in the hospital for three months and underwent an operation in Miami in which a piece of bone was removed from the spine. He is now able to go back to work. Peewee still wears a brace on his back but says he feels well enough to go back to work. He will pick up, your laundry and dry cleaning, and deliver it, according to the plan he worked out with Mr. Cowart.

### Baseball Club In The Red \$46.92

George M. Belk, chairman of the baseball club, presented general receipts to the club, amounting to \$16,300 and expenditures for the club of \$16,228 at the weekly luncheon of the Lions Club Tuesday. This leaves only \$30 in the treasury and an amount of indebtedness of approximately \$50. Belk stated. These two home games which are scheduled to be played on Aug. 24 and Sept. 14 are expected to take in approximately half of the deficit, he said.

The public hearing by the war department on a proposed city dock in Pahokee was adjourned yesterday. George M. Belk and Carol Chase were named on a committee to attend.

Club members voted to resume publication of the "Pahokee Ballinger," a monthly publication designed to purchase duplicator, and other necessary equipment.

### Marine Corps Want More Men

Young men from this territory who want to do their part in protecting their country against aggression can find no better way than to enlist in the United States Marine Corps.

Cards for young men in the Marine Corps. Besides the numerous technical training courses offered more than one hundred selected courses in academic and vocational fields.

The Marine Corps offers men

and accountants, grade and high school subjects, and engineering

courses in automobile, aviation, electrical, mechanics, electrical, and air conditioning, permitting them to prepare themselves, while in the service, for positions of importance upon the completion of their tour of duty.

### TAKE YOUR RESPONSIBILITY

Speculation in the daily and weekly press over the effect of the new tax laws on county taxes may be more or less evident than what the new tax laws will do entirely up to the people.

And it's this point which Comptroller Jim Lee has been drumming in his publicity releases for the last two months.

One of the provisions of the new tax laws gives the governor and the comptroller authority to reject any county budget which shows, in their judgment, a greater increase in taxes than is necessary. But even Governor Holland, able as he has proved himself, can't tell whether or not any item is justifiable unless he is personally familiar with the situation.

There's where the people come in.

Over in Bartow the other day, according to newspaper reports, taxpayers threatened to tax themselves a public meeting called to register the reaction to the \$300,000 increase in the Polk County school budget. And in consequence of that meeting the school budget has been rejected by the budget board and turned back to the county school board for adjustment.

We don't know whether the increases were justified or not. But the tax collector is given a public which is informed as to what is going on, is effective to point out to county officials that they are "servants of the people" in more than just a rhetorical sense.

County officials here have assured the people through the columns of the Gazette that no great increase in the budget of the county, and hence in taxes, will result from the new assessment of property, and we believe that they are sincere in this statement.

But the fact remains that there may be some things which the county commission will deem necessary which we, the people, may think are unnecessary. We may find them out too late for us to do anything about it.

So if you're interested in your taxes, if you care enough about democracy to participate as every American should, attend the county commission meetings.

The school board also is considering its tentative budget.

Here's a chance for you and every other citizen to make sure that your taxes will rise. The right to vote on raising taxes is one in which we, the people, are vitally interested.

Let's not leave it to the governor to spot the "unnecessaries" if any should be included in Oscoda's next budgets.—Kissimmee Gazette.

### KEEPING BUSINESS IN FLORIDA

(Continued from Reporter Star)

Comptroller Lee has refused to sign a \$10,554 printing bill for booklets obtained by the Florida Citrus Commission printed by a New York firm.

Florida has a law which requires work of this kind, paid for by tax payers' money, to be done in this State.

While the law is a good one and a protection to the taxpayers, it can work to the detriment of the taxpayers if printers, knowing the regulation, take advantage of the situation in their bidding. However, competition among Florida printers is quite keen and we believe will eliminate any great injustice as far as price is concerned; and when it comes to quality the work of many Florida printers compares favorably with that to be found.

As the printing bill was \$8,005 the rest being for freight, photographs and the like, bringing the total to \$10,796, we do not believe the Florida bid would have been out of line when the cost of freight and incidentals was considered, for many of them would not have occurred had the job been printed in Florida.

This is not the first time Comptroller Lee has held up bills when the statutes were disregarded, and those having the placing of this work should realize there are laws to comply with as well as the justice of spending Florida money with Florida firms.

### GAZOLINE RATIONING

Florida's tourist season and the state's whole budget for the next year would be disrupted if the threat of gasoline rationing on the Atlantic seaboard becomes a fact.

Miami Chamber of Commerce is properly aroused over intimations that rationing is imminent unless means can be found to get gasoline from the Western oil fields to the sea.

Two pipe lines are projected and one is in course of construction to bring oil from the fields to refineries in the East. The line under construction may be finished within 90 days. If so, the threat of rationing will be lifted, but the necessity for conservation will not have been entirely dispensed with.

The two projected lines may be completed within nine months, and when they go into service, the question of gasoline shortage will not again arise to plague the population of the seaboard.

We agree with Miami Chamber of Commerce that Floridians are particularly willing to make whatever sacrifices may be necessary in the furtherance of the defense program.

But gasoline rationing, particularly in

view of the fact that there is no shortage of the fuel, would affect Florida's ability to pull her share of the load of defense highway construction.

It would cost off 50 per cent or more of our tourist business, thereby reducing the income of hotels, apartment house operators, restaurants, amusement enterprises—in fact, reduce the revenue of every phase of our business life.

The Chamber of Commerce is inviting the whole state to join in a campaign of voluntary saving of fuel to the end that the lessening consumption of our own people might demand more gasoline for those who live in Northern states.

The hope is that people who customarily spent their winters here may find it easy to purchase gasoline for their automobiles en route. And there is further hope that it will not be necessary to impose rationing.

It is a campaign in which every citizen should join with enthusiasm, since it so vitally and directly affects the pocketbooks of every man, woman and child in Florida.—Miami Herald.

### ERSATZ MATERIAL IN DEMAND

National defense has put the reverse English on substitutions. Only a few months ago most people considered the new synthetic and plastic materials—"substitutes" from old and raw materials. Today the old basic raw materials, lead, iron, cotton, wood, and glass have become the substitutes. National defense which requires and takes first choice of materials has preempted the new synthetic rubber, the plastics, the synthetic textile fibers and the new materials.

German "Perstaz" in the last war meant inferior man-made synthetics which the public had to use to replace national materials which could not be obtained of which were going into armaments. America's new materials have become the cream that goes to defense and civilians must content themselves with old fashioned stuff again.

Don't be afraid you will have to use synthetic rayon stockings. The new synthetic rayon stockings will get it first. Your hose will not be strong rayon—it is going to make tire cord for the motorized army. Even nylon may be hard to get if things go on as they are.

Only a few months ago plastics were going to save the U.S. from a metal shortage. Now plastics are being sought after some metals to save the nation from a patriotic shortage. Union Carbide's Vinylite, now made in thousands of tons, could help both as a metal substitute and for silk hose—but it is all going for electrical insulation on ships.

Anomalies and surprises crop up everywhere you look in the current industrial assembly for man's salvation. What happened week to week and what may be a readily available substitute tomorrow will be under priorities tomorrow. To solve a shortage at one point almost certainly means the creation of a new shortage somewhere else.

The reason for the synthetic shortage is that these new materials have found so many surprising uses and have been getting special jobs that their use is being jettisoned beyond all bounds of production.

It bodes well for the new markets that they hope to obtain after the war—Wall Street Journal.

### SEA ISLAND MAY REPLACE SILK

For the past ten years the movement to raise the silkworm of Sea Island cotton, particularly in those parts of Florida they are suited to its culture, has met with a fair degree of success.

Experimental plots have been tried in many counties in north and central Florida, the largest acreages having been devoted to it in the traditional cotton-producing counties along the northern border of the state. Some other countries, too, have also planted it successfully, and one tract of about 25 acres is now growing in the north part of Brevard County, about ten miles north of Titusville.

It is difficult to forecast the future, but if the halting of silk shipments from Japan might prove to be a greater boon to the production of Sea Island cotton than any other, the market for it will be assured. Cotton made from this cotton were displayed in Titusville a year or two ago, and similar displays are common at fairs throughout the state. Sea Island Cotton Bureau has experimented with making high grade stockings out of this product and it has been introducing them at various points in the state.

This week Commissioner of Agriculture Nathan Mayo instructed his director of markets, William L. Wilson to offer the Sea Island crop of this state to the federal government as a substitute for silk. Mr. Wilson will advise the federal authorities of the present crop in Florida and will probably make a trip to Washington for that purpose.

Florida is the principal source of supply of Sea Island cotton, and while a larger acreage was planted this year, unfavorable weather conditions in the northern part of the state will hold production to the same as last year. Advance prices now offered to growers are higher than last year, and it is possible, in view of the shortage of silk, that they may be raised.

Every effort is being made to protect the quality of the seed for next year in anticipation of a greatly increased demand for this silky, long-staple cotton. Since the supply is very limited and the possibilities for its use almost unlimited, it seems that the situation offers Florida farmers an excellent opportunity to develop a crop for additional income.—Titusville Star-Advocate.

But gasoline rationing, particularly in

## A Million Dollar Tree

TREES that yield oil have attracted industrial nations and none more than the one yielding tung-oil. The Chinese have used it for centuries in making varnish, but the trees in other countries have seen in tung trees a possible Eldo-

riean prospect because the planters did not know.

A long growing season and intense summer heat are also essential. Present day plantations of tung-oil trees, located in the climatically favorable parts of Florida, Georgia, Alabama and Mississippi, are largely in the malarial sections of America, and successful planters have to guard their trees against the ravages of the tinea, a louse that causes a labor shortage during their busiest season.

Most of the more intelligent men use various methods to prevent malaria from their fields, six miles away. To those who are careless enough to ignore or forget this preventive measure, a spell of malaria can be as bad as a spell of the tinea. For these unfortunate, a dose of 20 grains of quinine a day for 5-7 days is the remedy. This dosage is the maximum recommended by the United States Public Health Service, and its cost is so low and tung-oil so valuable that few are likely to ignore it.

should be passed. The Legislature must have agreed with Gilbert and me, for the bill became a law.

I don't know when or where he was born. I don't know anything about his early life, but I know he is all right now.

Leach is the owner, editor, publisher, and contact man for the Leesburg Commercial, of Leesburg, Lake County, Florida. The Commercial has one of the finest, if not the very finest, publishing plants of any weekly newspaper in Florida. Indeed, its plant is as

the most protracted revival we ever had in Blountstown when I was a boy never ran longer than two weeks. Most of the sinners were either converted in that time or given up as beyond redemption.

The most protracted revival of the publishers and editors of Florida, have been protracted in this column for the past eight weeks, and still I am not afraid you will have to use synthetic rayon stockings. The new synthetic rayon stockings will get it first. Your hose will not be strong rayon—it is going to make tire cord for the motorized army. Even nylon may be hard to get if things go on as they are.

Only a few months ago plastics were going to save the U.S. from a metal shortage. Now plastics are being sought after some metals to save the nation from a patriotic shortage. Mr. Wilson will advise the federal authorities of the present crop in Florida and will probably make a trip to Washington for that purpose.

Florida is the principal source of supply of Sea Island cotton, and while a larger acreage was planted this year, unfavorable weather conditions in the northern part of the state will hold production to the same as last year. Advance prices now offered to growers are higher than last year, and it is possible, in view of the shortage of silk, that they may be raised.

Every effort is being made to protect the quality of the seed for next year in anticipation of a greatly increased demand for this silky, long-staple cotton. Since the supply is very limited and the possibilities for its use almost unlimited, it seems that the situation offers Florida farmers an excellent opportunity to develop a crop for additional income.—Titusville Star-Advocate.

But gasoline rationing, particularly in

impressive as most daily newspapers. It is almost the largest single business establishment in Leesburg.

When he is not at Tallahassee attending the Legislature, Leach presides over his publishing enterprise, and in the evenings, he is a cordiality of an anti-bellum plantation proprietor. He has an unusually large number of staff assistants at the Commercial. There are men close to him, a kind of family.

Leach is a man of rather small stature. He is well proportioned and sets a dignified, commanding air so often seen in old-time newspaper publishers.

He has a pleasant, open face, illuminated by a pair of brown, friendly, luminous eyes. Next to the saintly, saccharine Willis M. Ball,

Leach has long been a voting member of the Florida Times-Union, Leach

spirit in the Florida Press Association. I think I've heard that he was one of its organizers, and maybe an early president of it.

Anyway, he has usually been present or accounted for at all the meetings of the Florida Press Association that I have attended.

Leach is a man of rather small stature. He is well proportioned and sets a dignified, commanding air so often seen in old-time newspaper publishers.

He has a pleasant, open face, illuminated by a pair of brown, friendly, luminous eyes. Next to the saintly, saccharine Willis M. Ball,

is the most benign looking man in the world.

Although not possessed of the commanding qualities of Leach, is the celebrated William A. White, of the Emporia (Kan.) Gazette. Florida would be better off if it had more men like Leach.

**NEW BOLTON EMPLOYEE**

Vernon Harper of Wauchula, recently arrived at the Bolton Drug store this week, is the newest addition. Harry Layfield who has been employed there for several months and returned Saturday night to his home in Trenton, Fla., where he will be employed in a sundry store.

The Chinese have used tung-oil for years in making varnish.

radical changes have brought some of these trials, two recent ones.

This Chinese tree needs a winter chilling, but flowers so early that its bloom is often killed by late frost. The tree is said to be hardy to the date of the first frost. Millions of tung-oil trees, especially in the southeastern United States, have

been uprooted because the planters did not know this.

A long growing season and intense summer heat are also essential. Present day plantations of tung-oil trees, located in the climatically favorable parts of Florida, Georgia, Alabama and Mississippi, are largely in the malarial sections of America, and successful planters have to guard their trees against the ravages of the tinea, a louse that causes a labor shortage during their busiest season.

This week Commissioner of Agriculture Nathan Mayo instructed his director of markets, William L. Wilson to offer the Sea Island crop of this state to the federal government as a substitute for silk. Mr. Wilson will advise the federal authorities of the present crop in Florida and will probably make a trip to Washington for that purpose.

Florida is the principal source of supply of Sea Island cotton, and while a larger acreage was planted this year, unfavorable weather conditions in the northern part of the state will hold production to the same as last year. Advance prices now offered to growers are higher than last year, and it is possible, in view of the shortage of silk, that they may be raised.

Every effort is being made to protect the quality of the seed for next year in anticipation of a greatly increased demand for this silky, long-staple cotton. Since the supply is very limited and the possibilities for its use almost unlimited, it seems that the situation offers Florida farmers an excellent opportunity to develop a crop for additional income.—Titusville Star-Advocate.

But gasoline rationing, particularly in

## Give Your Car High Anti-Knock in BOTH Speed Ranges

These two horses symbolize the two main speed ranges in driving a car. The draft horse stands for the low-speed or traffic driving range. The race horse symbolizes the high-speed range, used on the open highway.

You need high anti-knock, not in just one of these speed ranges but in both. And you get this Double-Range

group. Many of them earn \$17 a week and are proud of their jobs that there hasn't been a single resignation since this started several months ago. The waiting list is long and growing larger.

A few weeks ago, it was decided in the company's councils to double capacity by getting an ad-

ditional building and the next morning, a young army man nearly 100 women having gotten word of what was up stood at Mr. Hawkins' door for jobs in the new plant. Many of these were not on the relief roll, but Mr. Hawkins says, "The second place I went to after a few days, he had a permanent job offer." The second place has just been put in operation, employing 73 women—123 in all.

Of course, the fact that the company has been able to increase its revenue from approximately \$45

per log to \$60 per log through manufacturing the carton, hasn't hurt the situation any, but Mr. Hawkins' idea of getting out of the relief roll, too, so she went down and signed permission for him to go, too. So she went to another place and got a job to support herself and her invalid husband. After two or three weeks, she had paid up her bills and then blossomed out in a new dress, hat and shoes, as happy as a lark.

One young woman developed a bone-felon and had to drop out for a few days. The next morning half a dozen other women came up with the same answer to take her place; but because they were novices with no speed, they couldn't be accommodated.

Numerous incidents of human nature are cited by Mr. Hawkins, some of them pathetic, some funny, all interesting. The 123 how employed are the envy of Taylor County.

As that's how the Fair Labor Standards Act has practically wrecked relief in Taylor county.

**Child-Labor Laws**

(Continued from Page 1)  
years of age shall be employed permitted, or suffered to work in any gainful occupation for more than six consecutive days in any one week or more than 40 hours during any one month. Any minor under 16 years of age be so employed before 6:30 a.m. or after 8 p.m. . . .

It is provided that no minor between 16 and 18 years may be employed before 6 a.m. or after 10 p.m., "providing that minors between 14 and 18 years of age may be employed in a concert or theater, and in a motion picture house, or who get their living placed in remote and often uneven, wild posts, work like the devil, and pray for occasional leaves of absence."

**WEATHER**

Temperature and rainfall at Canal Point, Fla., for the week ending August 14, 1941.

Day	Max.	Min.	Rain
Aug. 4	93	63	0.04
5	88	68	0.33
6	88	68	0.12
7	87	68	0.05
8	89	66	1.56
9	94	67	
10	93	68	

Total rainfall since January 1, 1941—49.27.

**Spats and Walking-Sticks**

Some of our rough and ready hard guys from the great open spaces folks fun at the diplomatic representation that the U. S. in the tropics, they are accused of wearing spats, going to too many cocktail parties and some are even said to wear monocles.

American tourists resent the palpable appearance of U. S. consuls.

Cordell Hull never bothers to answer such criticism. As Secretary of State he knows that most of his staff are Americans, highly trained men who get their living placed in remote and often uneven, wild posts,

work like the devil, and pray for occasional leaves of absence.

Some time ago Secretary Hull made a tragic, if indirect, answer to such critics. He announced that the American consul who had lived for 15 years in tropical America, the pilot of it is the man died of malignant malaria—a preventable and curable disease.

It must be presumed that the consul knew that quinine taken in time would have saved him. But perhaps, like most of us, he became careless. The U. S. Public Health Service has broadcast the cure and prevention of malaria, but it must be remembered one should forget that this unnecessary death makes worth repeating:

As a preventive of malaria take a sufficient dosage of quinine daily whenever exposed to the bite of infected mosquitoes. If malaria comes, take 20 grains of quinine daily for 7 days and then the quinine will stop. Such a regime would have saved the life of our diplomat.

**Tobacco Brings Good Prices**

Lake City, Aug. 14—Tobacco sales here today were estimated at over 250,000 pounds, with close to 500,000 pounds on floors for Wednesday's opening. Best grades were heavily sold from 25 cents and medium grades from 22 cents up. The low was 3 cents.

IN COUNTY JUDGES' COURT, IN AND FOR PALM BEACH COUNTY, IS  
IN RE: ESTATE OF WILLIAM EARL

ALSO KNOWN AS W. E. WILSON,  
DECED.

NOTICE TO CREDITORS:
